In November 2016, Fast Retailing opened the JEANS INNOVATION CENTER as a denim research and development facility in Los Angeles. The center creates designs with an emphasis on quality, the pursuit of safe and efficient operations, and the reduction of environmental impact during the manufacturing process. An example of one of its innovations is the production of pre-faded and pre-ripped jeans. By adopting a laser process and other leading technologies, the Jeans Innovation Center aims to shorten manual processes and greatly reduce chemicals, water and waste.
